DETAILED ACTION

Election/Restrictions

1. Claim 5 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/17/09.

Response to Amendment

This office action is in response to amendment filed on 7/17/09. Of the previously presented claims 5, 7, 10, and 11; claim 7 has been amended and claim 5 has been cancelled.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Transmitting and receiving data with low BER in presence of interference between subscriber stations.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2617

4. Claims 7, 10, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 7 recites several limitations that are denoted with a “the” without sufficient antecedent basis. For example, line 1 recites “A method for transmitting and receiving **the** (emphasis added) data”. However, there is no previous recitation of data for which the recited “the” is referring to.

Additionally, lines 6-7 recite “assigning to each SS its own **identification code** (emphasis added) Unique Address Code (UAC) and its own Encoded Information Group (EIG)”. This limitation is indefinite because it can not be determined whether the identification code is something separate that’s assigned to the SS along with the UAC and EIG or if it refers to the UAC. If it is separate, then commas are needed to distinguish the three items i.e. assigning to each SS its own identification code, Unique Address Code (UAC), and its own Encoded Information Group (EIG). However, if the identification code refers to the UAC, then the claim should be amended with additional language to show this reference.

Regarding claims 10 and 11, the limitations are rejected based on their dependence of claim 7.

Allowable Subject Matter

6. Claims 7, 10, and 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
